

PROJECT BRIEF

Town Hall Road Box Culvert Replacement

Location: Beloit, Wisconsin

Client: City of Beloit

Project Year: 2010

Lead Batterman Staff: Tony Fortin, PE

Client Contact:

Mike Flesch, PE, City Engineer
Tel: (608)364-6696

Project Description

Due to the nature of this site, this project involved wetland research in addition to typical hydrology/hydraulic calculations. Batterman provided multiple design options to the City with construction cost estimates to identify the most economical option, to place this new structure within the limited right-of-way width.

Batterman Services

- Surface modeling
- Hydraulics & hydrology analysis
- Wetland and navigable waterway review
- Soils investigation
- Reinforced concrete design
- Erosion control
